Corporate 2 - Overview files

As usual you can download Corporate 2 quickstart version for fast installation to enjoy quickly full characteristics of our demo. See respective chapter further ahead.

After having download all of the files from our commercial section, here's an brief content evaluation of the Corporate 2 package. Have in consideration that some of the used tools posses their respective support manuals, so we will provide orientation guidance for the respective installation and include also some screenshots about the configurations of all parameters of each module. To get additional informations of our extensions, please read the Support Manual included on the respective package.

Here's a brief overview of the files available inside the "Corporate 2" template package.

» gk_corporate2_J!15.tgz - This is the template file and for installation, please use Joomla installer.

» gk_corporate2_rest_files_J!15.zip

> After decompression of _rest_files.zip you will find following folders:

» components "folder"

Here you can find file including list of components used on demo server for this template. Components can be downloaded for free from Gavick website.

» jcomment theme "folder"

Here is special theme for Jcomment component from JomlaTune. To use this simply copy the gk_style to components/com_jcomments/tpl/.

» modules "folder"

Here you can find information about used modules and website where you can download them.

» plugins "folder"

Contains the GK Typography plugin (plg.gk_typography.zip) for WYSIWYG editor use. For respective installation, please use Joomla Installer and them enable it on plugins manager. There is also plugin for advanced menu parameters (plg_system_menuparams.zip). Thanks to this plugin you can insert menu sub-titles etc.

» source "folder"

For further customization of template source files may be handy. All files are saved as layered Photoshop PSD files.

» gk_corporate2_quickstart_J!15.zip - This is complete Joomla package including Corporate 2 template, components, modules, plugins and content similar to Gavick Corporate 2 demo. Installation procedure is same like original Joomla installation, after finishing use admin/demo login information.

* gk_party_freak.psd	* interface_elements.psd	* wide_backgrounds.psd
* logo.psd	* typography.psd	* pdf buttons.psd

Other files necessary and not available inside package

Notices!!!

Font(s) used on the source files are not provided with the Template package, because they may have copyrights reserved.

The images used on demo might contain other proprietary copyright information that should be considered, so it's strictly prohibited the use, duplication or disclosure of this images.

Corporate 2 Apr'10

Corporate 2 Quick Guide Step by Step Installation

For experience users in Joomla!, the following list of tasks should be enough for a proper installation of the template and all extensions. Having as a principle that already have the latest joomla version installed on your site, follow these basic instructions:

Step 1) Install Corporate 2 template using the Joomla installer. File: (*gk_corporate2_J!15.tgz*)

Step 2) Head to Templates Manager and establish Corporate 2 as your default template.

Step 3) Again through the joomla installer, install Tabs Manager GK3 component. You must first download it from our free download extensions tools. File: (*com_gk3_tabs_manager.zip*).

Step 4) Still from the Tabs Manager GK3 component package, install the respective module. File: (*mod_gk_tab.zip*).

Step 5) Then install the News Show Pro GK1 module using the Joomla Installer. File: (*mod_news_pro_gk1.zip*).

Step 6) Do not forget Photoslide GK3 component using the Joomla Installer. File: (*com_gk3_photoslide.zip*).

Step 7) And still from same package from modules directory install GK Image Show module using the Joomla Installer. File: (*mod_gk_image_show.zip*).

Step 8) K2 is a powerful & extensible content component for Joomla! with CCK-like features designed & developed by JoomlaWorks, install it using the Joomla Installer. Download from http://getk2.org/

Step 9) For unleashing full menu features you need to install system menu plugin using the Joomla Installer. File: (*plg_system_menuparams.zip*).

Step 10) To spice up your joomla content, install GK Typography plugin and enable it on Plugins Manager panel. File: (*plg.gk_typography.zip*).

Step 11) From JoomlaTune install JComments component (*com_jcomments_v2.1.0.0.zip*) using standard Joomla installer.

Step 12) Copy JComments style from rest_package zip folder and select gk_style as template (inside Layout setting).

Step 13) Again from JoomlaTune install JComments Latest module using standard Joomla installer. File: (*mod_jcomments_j15_v2.5.4*).

With all 13 steps completed, your website has all the necessary conditions for Corporate 2 template.

Corporate 2 - Template Parameters

Quay comes with several parameters that you can configurate as your needs. To access the template parameters, navigate to "Extensions > Template Manage" and select gk_party_freak template. Press "edit" option or just click on template link as you be able to see the following parameters table.

Presets template parameters:

Template color:
Select default template color (Blue/Red/Green/Neutral).

Show mainbody on frontpage:
Show or hide mainbody on frontpage.

Mainbody position:
Set mainbody position to the following options:
. No mainbody
. Mainbody or component
. Mainbody before component
. Mainbody after component

Default layout:
Define the layout of the template.
. Default
. Handheld.
. Iphone.
. No_columns.
Please note, that mobile layout has only 2 module positions... mobile_top and mobile_bottom!

Page layouts overwrite:
This is neat feature for diversifying your site layout for different pages. Simply add ItemID or component name=layout name

Iphone:
Define layout for Iphone devices

Dimensions:

In this section you can configure width in pixels of all template blocks. Please, make sure you make backup before changing as wrong values will make you site look distorted.

For fluid site width use Auto setting or Specified percentage setting.

Fonts:

Here you can define font that you want to be used for several website elements. If you want to use Cufon font you can generate your own font on website: http://cufon.shoqolate.com/generate/

Same applies in case Cufon font provided with template doesn't include apostrophes and other special characters for your language.

Features:

Login button:
Select if you want to show login button.

Register button:
Select if you want to show register button.

Select Logo Type:
If you want to have image instead of text select Image.

Logo text:
Enter here your logo text (in case you have Logo Type selected to Text).

Slogan:
Enter here your slogan - smaller text next to your logo text (again only in case you have Logo Type as Text).

Tools:
Select if you want to show template tools (for font size adjustments and template width).

Date:
Select if you want to show current date.

T3 Logo at bottom:
If you want to show T3 logo at the bottom of your site put ON. Otherwise OFF.

Style switcher:
If you want to show style switcher on bottom of site select ON, otherwise OFF.

Copyright:
Write here your copyright notice. It will appear in the middle at the bottom of your site (on left to style switcher).

Module as Component (on mainbody).

Our templates allows you to display any Module as Component (on component mainbody position). It will display full width or not, depending on the module width configuration. If you have any doubt of this feature, please ask us for support in GavickPro Official Forum.

Modules Variations

Corporate 2 template does have three basic module class suffixes, three special module class suffixes for News Show Pro GK1 and additional four for GK Tab module.

There are three basic module suffixes included in his template.

| No module class suffix | Module class suffix: color | Module class suffix: dark | Module class suffix: clear |

Four module class suffixes for GK Tab module:

Module class suffix: " green"

Module class suffix: " blue"

Module class suffix: " red"

Module class suffix: " neutral"

Module class suffixes for News Show Pro GK1 module:

Module class suffix:
" nsp_nm nsp_bt"

Module class suffix:
" nsp_nm nsp_st"

" nsp_nm" – useful when you have disable module title and you want to set article title in place of module title

" nsp_st" – small titles in the module

" nsp_bt" – big titles in the module

And you can always mix more suffixes together like:

" clear nsp" or " clear nsp_nm nsp_st" or " nsp_nm nsp_bt"

Tabs Manager GK3

Tabs Manager GK3 is an amazing tool to display content on tabs, like articles, modules or even custom XHTML content. You need to download this component from our free download section on http://www.gavick.com/downloads-area.html. For more detailed instruction please visit Gavick Tools website and download Tabs Manager GK3 documentation: http://tools.gavick.com/help/HelpFileTabsManagerGK3.pdf

News Show Pro GK1

News Show Pro GK1 extension is one of the most popular extension on Joomla Community. For many users, perhaps the best ever made. We like to think that the best is yet to come.

With its powerful capabilities and presentation of articles and news content, News Show Pro GK1 offers you an amazing ways to display your website content in the most stylish and highest level of professional presentation.

Once again, you need to download this free module from our tools download section on http://www.gavick.com/downloads-area.html and them unpack the file.

For detailed instruction please visit Gavick Tools website and download News Show Pro GK1 documentation: http://tools.gavick.com/help/HelpFileNewsShowGK3.pdf
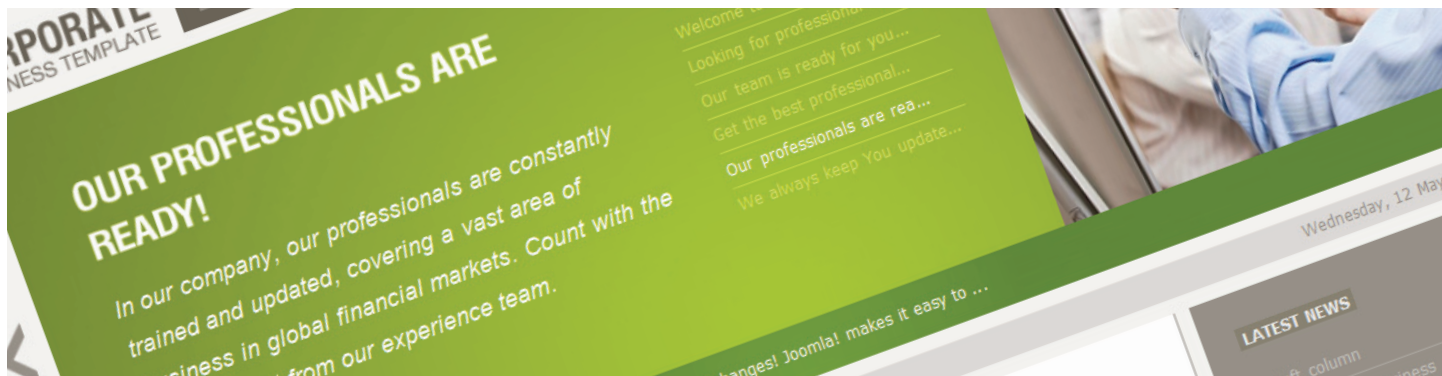

PhotoSlide GK3

PhotoSlide GK3 is the most advanced and free component for Image Slide available for Joomla!1.5. You need to download this package from our free tools download section on http://www.gavick.com/downloads-area.html and them unpack this file. Using the Joomla Installer, search for the com_gk3_photoslide.zip and select "upload and install". A message will appear saying 'Upload Component – Success" and it will show you an overview of the component.

For further detail information, please read the PhotoSlide GK3 HelpFile provided in the _doc! folder package.

Gavick Image Show Module

For frontend display of the PhotoSlide GK3 groups, you need to use the GK Image Show module. t link directly the In this template, we create an exclusive module style and engine for Image Show module with his our parameters. So, using the Joomla Installer, search for the mod_gk_image_show.zip and select "upload and install" A message will appear saying 'Install Module Sucess". If all goes well, you should see the Gavick Image Show module available on "Extensions > Module Manager" list. Find the module and get inside for configurate.

Module Configuration

To avoid repetition of the instructions included in the Support Manual of this tool, please see the respective files available on the extension package. There you will get orientation the administrate the different parameters available on News Show Pro GK1.

Extended menu plugin overview

As was already mentioned at the beginning for proper work of extended menu parameters is necessary to install plg_system_menuparams.zip from gk_Corporate 2_rest_files_J!15.zip. And do not forget to publish this plugin!

To use extended parameters you need to use Mega Menu as your Menu type (defined inside template setting)!!

We implemented this new feature extremely useful for the use of typography, specially created for the template. Like in all joomla

Show Title:

Setting to No will hide menu title..so you will get only blank space if selected to Yes.

Add Description:

Add subtitle for menu item.

Columns:

Define number of columns you want to have for items under this menu item.

Group:

Do not group first level menu items! This apply only on second level menu items. Grouping will show 3rd level menu items bellow their parent 2nd level menu item.

Submenu Content:

This is most important extended menu parameter. There are three settings:

» Child menu items = normal menu item behaviour

» Modules = include module inside menu (using Ctrl you can select more modules)

» Module position = will load module position inside menu (again using Ctrl you can load more module positions)

Here are some recommendations that might help you.

Are you new in Joomla?

If you are new in Joomla, we strongly recommend that you perform some tests and experiences to fit into this excellent CMS (Content Management System), and visit the oficial support forum of www.joomla.org for any problem direct relationship. GavickPro Studio is not responsable for Joomla, neither gives respective support. Nevertheless, if possible, we will be happy to help you in our support forum.

Building a new Website ?

If you are building a new website and if you like our demo, we strongly recommend the use of QuickStart version, and from this start change it with your own content and easily make any necessary configuration adjustments.

Get quick acquaint with Corporate 2 template

In all cases, if you are a new or already experience user, we always recommend experimental version, using free popular local server like XAMPP or WAMP *(you can find easily information on internet about this excellent tools for website development)* or if you prefer, an online test installation. This way, you be able to fit more fast and easily in some tools configurations, modules positions and other particular details that you need to know.

You already have a website and want to use this template ?

If you choose to install this template in an already existing website, make sure that you have the latest version of Joomla *(present version - J!1.5.15).* If not, please upgrade to insure compatibility with our template and extensions. Naturally, if this is your case, you must install all files individual, from template to components, modules and plugins. Nevertheless, please remember that the QuickStart version is still important ally for orientation. Just remember the previous recommendations.

Do you have some problems with our extension?

Some usual problems reported on our support forum are script conflict from 3th party extensions. If you know Joomla enough, you know there's an huge amount of solutions and extensions available for free or commercial from other teams or developers. Naturally, you will search others extensions to complete some particular funcionality to furfill your website needs. But understand that we are responsable only for our template and extensios, and we cannot garantee that all 3th party tools will work perfectly with our project. So, it's in your hands to choose those extensions on Joomla Comunity. Nevertheless, ask for support in our forum, and if possible we will try to provide your solution.

Another usual problem identified in our forum is related with permissons on files and directory. Some tools need specific files to have rewrite or read permissions, so you might find some problems if you don't have this permissions set. Notice that we cannot control your server security configurations, but we can provide directions were you must change this permissions. If you are unable to change it, we advice you to contact your host provider.

Keep always updated!

We strongly recommend regular visits to update.gavick.com, were you can find the latest updates of our templates, components, plugins or modules. If you have any problem, please be sure if the solution is not already available. This way will avoid waste time, searching or asking for solutions in our forum support.

Keep always updated!

We strongly recommend regular visits to http://www.gavick.com/updates.html were you can find the latest updates of our templates, components, plugins or modules. If you have any problem, please be sure if the solution is not already available. This way will avoid waste time, searching or asking for solutions in our forum support.

Need some small Style customization adjustment?

You can always request support to our Moderators or Developers, but you need to take in mind that this is customization and not regular support service. In future, GavickPro might provide personnal customization services and installation support, but it's not yet available as standard service. The Developer MemberShip is excluded, since this subscription already have this type of support, if needed. Nevertheless, we will always try to help you.

If you have some experience in CSS styling, we strongly recommend the use one of the most powerful tool for WebDesigners, available for free in FireFox addons – The FireBug – without any doubt, you can't find most powerful ally if you are building a website.

What is the better way for me to report my problem in the support forum?

If you need help on some issue, please report on our forum in the most objective way, be polite and preference in english language.

Always identify your URL for faster support, because in most cases our support team needs to see the problem.

Need to contact Us?

Besides our official forum support, you can also contact us by Skype. Please check our contact page and we will reply as soon as posible.
