# Leviathan Logo Editing

There are two methods of changing the Leviathan logo: **via the logo picker** and **manual** change.

The Logo Picker

1. Enable **Logo** and set to **Custom** at *Admin → Extensions → Templates Manager → rt_leviathan → Features.*
2. Set **Logo Picker** to either **RokGallery** or **MediaManager**.
3. **Select** your logo, **Insert** and **Save**

Manual Change

1. Enable **Logo** and set **Type** to **Leviathan**.
2. Upload **logo.png** to the
   /templates/rt_leviathan/images/logo directory
3. Clear your browser cache and refresh.

If you cannot see your new logo, ensure you have uploaded it to the right directory and the directory permissions are writeable. Enquire with your hosting provider.
