Leviathan Template User Guide

A. Leviathan Template Overview

Please check the complete overview of Leviathan template including the Features and Screenshots, link to the demo site, download area, and the support forum.

1. Leviathan Template Announcement
2. Leviathan Template Overview

B. Leviathan RocketLauncher

If you are new to Joomla, we have RocketLauncher packages which are provided as an additional option to the template. RocketLauncher is a customized Joomla install, that installs a replica of the demo onto your site - inclusive of sample data, content, extensions, the template and sample images.

- **RocketLauncher must be installed as new, and not over an existing Joomla install.**
- **We also recommend you to install RocketLauncher on your localhost and use it as a reference.**

Note: All sample content images will be replaced with blank versions in the RocketLauncher version.

How to Install Leviathan RocketLauncher

1. Upload
- Download the RocketLauncher - leviathan-rocketlauncher -(j25/j30).zip
- Unzip the leviathan-rocketlauncher-(j25/j30).zip
- Upload the files to your server

Note: You can upload all the files via FTP, or use cPanel or SSH to upload the zip and unzip directly onto the server. Enquire with your hosting provider.

2. Installation
- Go to http://www.yoursite.com/rt_leviathan-rocketlauncher
- Follow the installation instruction which is basically same with regular Joomla installation
- The sample data will be installed automatically on RocketLauncher installation
- Remember your administrator "username" and "password" you set during the installation
- Delete the **/installation** directory on your server

C. Leviathan Template Installation

Please go to Leviathan Download Area and download the necessary files required for the template to function:

- Template (Standalone) leviathan-template.zip

Note: If Gantry Library has been installed at /components/com_gantry, please install the Standalone Template.

- Template (Bundle) leviathan-bundle.zip

Note: The Bundle Template is only necessary if the Gantry Library is not installed at /components/com_gantry.

Leviathan Template Support

A. Search
Most questions might have been answered several times on this forum, in whatever format that maybe. So we highly recommend you to use the "Search" function **here** before raising your questions in forum.

B. Top Tips for Support
Please make sure you follow our Support Guidelines **here**.

C. Post in the Appropriate Forum
You will most likely find the answer to your template question on the forum but if you not, please post in **Leviathan Forum** so our moderators can review and reply to your thread. Remember to follow the **Top Tips for Support** before posting your questions.

Note: Please never send PM to moderators unless requested. We check forum regularly but not our PM Inbox.
